**UMD.** is a worldwide online video service connecting passionate audiences. We provide unlimited catalogue of TV series and movies across all genres, ranging from fantasy, drama, comedy and documentary. **UMD.** is free and further will be available to stream across all devices: via mobile and tablet.

**UMD.** is an online video guide that allows you to easily search & discover over 1 million TV Shows and Movies across hundreds of stocks all in one place. Soon will be available on our apps in both the iOS and Android app stores, **UMD.** will transform your phone, tablet and laptop into a personal on demand home theater giving you the ability to watch anything, anywhere.

Keep updated with **UMD.**

Brief summary on each member's contribution :

**Dilmurod Valiev : (Back-end)**

Has contributed a lot and worked with **Ajax** and **API**. Dynamically created elements containing Movie Poster Img, Movie Title, Movie Overview, Movie link to YouTube. Developed basic **Laravel Routing** between pages. Connected Ajax+Js to API and got data from API.

**Farangiz Nurmukhamedova : (Front-End)**

Has designed and developed from scratch the "**Dashboard**" page, "**Movie genres**" page template for dynamic use, the one that can be accessed after log in. Used **js, css, bootstrap**.

**Bobur Iskandarov : (Back-end)**

Has developed the "**User update**" page and **Database**. Added all the needed functionality and components.

**Shakhzod Isomiddinov : (Back-end)**

Has developed "**Contact**" and "**Sending Mail**". Used **API Swiftmail** the feedback to the admin. Used Html Forms extention и bootstrap.

**Malika Sadullaeva : (Front-End)**

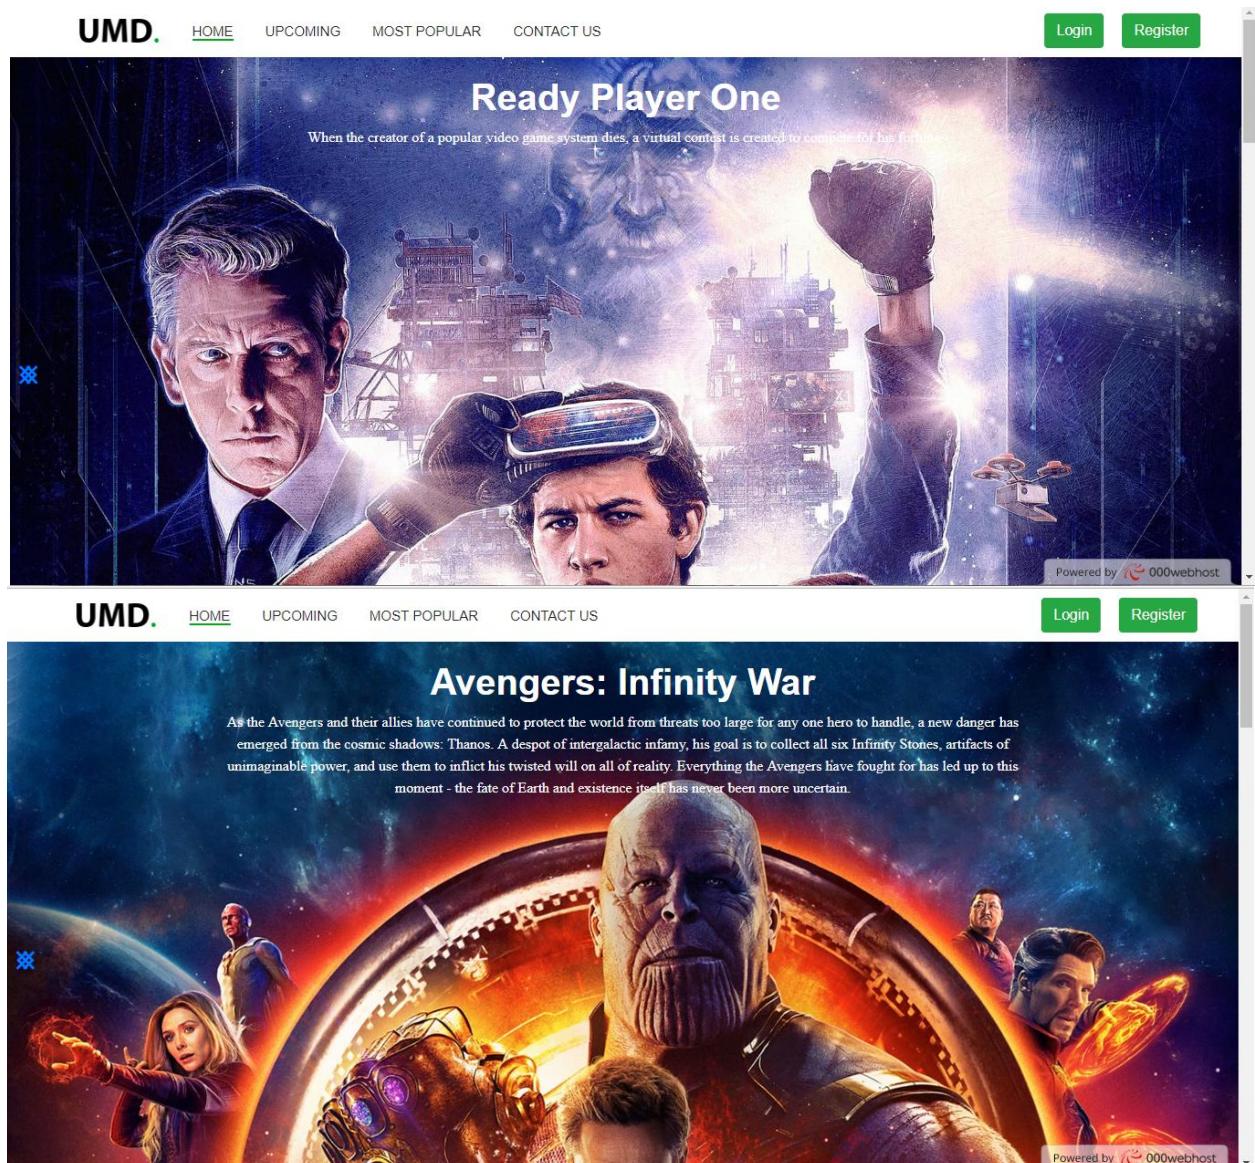

Has designed and developed from scratch the "**Main**" page, "**Account**" page and "**Tuition**" pages. Added all the required **js, css, bootstrap** features for the page to look professional and gentle. Made the mobile versions to add the responsive feature.

Screenshots for each feature/requirements for the web site. Below each screenshot, you should briefly describe what functionality given screenshot realizes and how it has been implemented.

## MAIN PAGE

containing :

- carousel-slider with the most popular movie posters
- **login and registration** buttons

- Link to Most popular (most popular films and tv series)
- Link to contact us (A contact page)

## Rampage

Primatologist Okoye shares an unshakable bond with George, the extraordinarily intelligent, silverback gorilla who has been in his care since birth. But a rogue genetic experiment gone awry mutates this gentle animal into a raging creature of enormous size. To make matters worse, it's soon discovered there are other similarly altered animals. As these newly created alpha predators tear across North America, destroying everything in their path, Okoye teams with a discredited genetic engineer to secure an antidote, fighting his way through an ever-changing battlefield, not only to halt a global catastrophe but to save the fearsome creature that was once his friend.

**Fifty Shades Freed**

Believing they have left behind shadowy figures from their past, newlyweds Christian and Ana fully embrace an inextricable connection and shared life of luxury. But just as she steps into her role as Mrs. Grey and he relaxes into an unfamiliar stability, new threats could jeopardize their happy ending before it even begins.

**Avengers: Infinity War**

As the Avengers and their allies have continued to protect the world from threats too large for any one hero to handle, a new danger has emerged from the cosmic shadows: Thanos. A despot of intergalactic infamy, his goal is to collect all six Infinity Stones, artifacts of unimaginable power, and use them to inflict his twisted will on all of reality. Everything the Avengers have fought for has led up to this moment - the fate of Earth and existence itself has never been more uncertain.

## A User Page

Contributor : Farangiz Nurmukhamedova

Here you can see a dynamically developed User-page. We can observe the navigation bar containing Home, Movies, New Arrivals and Coming Soon. When we click on Logout - we will logout. On the forehead you can see the owl-carousel, with the sliders of top three popular movies. Below there are the genres of the movies listed ranging from drama, comedies to documentary and etc. When we click on one of the specific genres, the event-handler activates "onclick" that is written in js. After that there are several Ajax requests are sent. And thus we get the required data. And dynamically create this blocks.

A large movie poster for "Avengers: Infinity War" is displayed prominently in the center. The poster features the ensemble cast of the Marvel Cinematic Universe, including Iron Man, Captain America, Thor, Black Widow, Hawkeye, Doctor Strange, Vision, and many others, set against a backdrop of space and celestial bodies.

Below the poster is a row of genre icons and labels:

- Drama
- Comedy
- Action
- Romance
- Crime
- Fantasy
- Science Fiction
- Thriller
- Western
- Adventure
- Animation
- Documentary

## Contributor to Back-End part : Dilmurod Valiev

Below as you can see are the posters of the movies of comedy genre that have requested on the onclick.

### Comedies

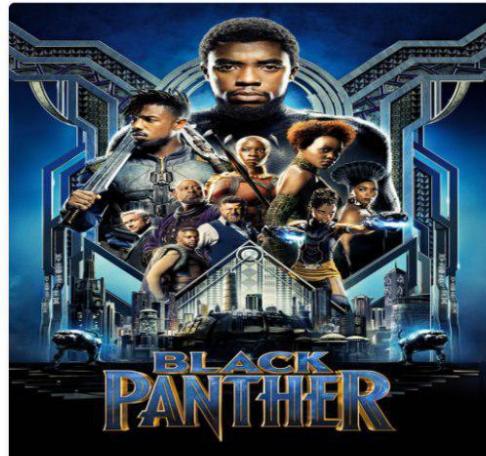

This particular genre activates and shows the block dynamically when the "Action" and "Thriller" genres are clicked.

## Action

Avengers: Infinity War

Black Panther

## Thriller

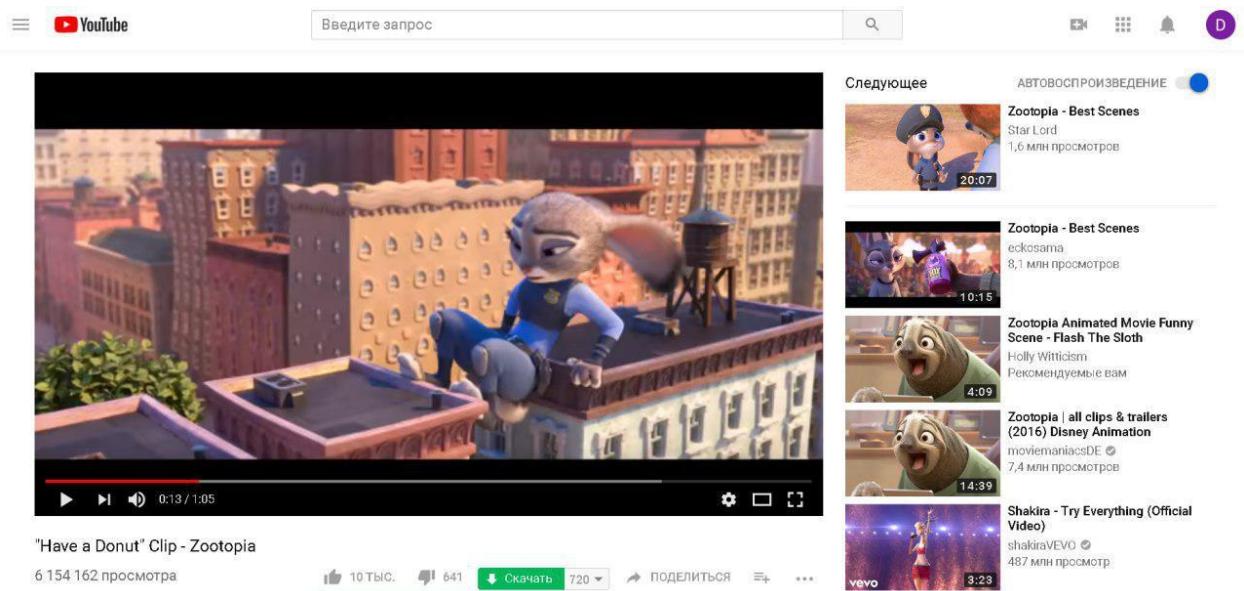

The Maze Runner

Geostorm

When we click on a poster or the title of the movie/TV-series, we will be directed to youtube, where the specific movie or TV-series can be watched.

## Contributor to Back-End part : Dilmurod Valiev

This particular block of images can be obtained when we click on the "Movies" in the vertical navbar. This is a feature of a dynamically-developed website, that we don't actually load a new page, but inside the page with a vertical navbar and all the other components being stuck into the same page, there are only required components that are being loaded. In this particular case, we are loading a "Movies" page inside the User page.

The image shows a movie recommendation system interface. On the left, there's a vertical navbar with icons and labels: 'Home', 'Movies' (which is selected), 'New Arrivals', and 'Coming Soon'. The main content area displays three movie posters side-by-side. The first poster is for 'Avengers: Infinity War', showing the Avengers and their allies fighting. The second poster is for 'Coco', featuring Miguel and his family. The third poster is for 'Avengers: Age of Ultron', showing the Avengers in action. Each poster has a title, a short description, and a 'Read More' link below it.

This are also "New Arrivals" and "Coming Soon" pages inside the User-Page, again created dynamically.

We create a My page setting, where user can change his/her “First Name”, “Last Name”, “E-mail”, “Password”, and change his/her Photo Picture. We are validating information using database. When the user wants to change his/her password, they will just type it in the area provided for that and will be asked to confirm it by re-typing in another area. Before sending the data to database, we check both areas using control ‘If’ statement.

## Contributor : Shakhzodbek Isomiddinov

The screenshot shows a contact form on a website. At the top, there is a navigation bar with the logo "UMD.", followed by links for "HOME", "UPCOMING", "MOST POPULAR", and "CONTACT US". On the right side of the navigation bar are two buttons: "Login" and "Register". Below the navigation bar, the title "Feedback" is displayed. The form consists of four input fields: "Name\*" (with a text input box), "Phone Number\*" (with a text input box), "E-mail\*" (with a text input box), and "Message" (with a text area). A red "Send" button is located at the bottom left of the form area.

Name\*

Send

Implementation of Contact page and Mail sending.

The Contact page are developed by using simple HTML, CSS and some Laravel Blade helpers.

There are form, with connected with postContact function in RoutesController and it sends all data from the form to this function. After receiving the data from form, function will check validation. If data pass the validation, the mail will be sent to the mail service named Mailtrap. Otherwise, it will show error.

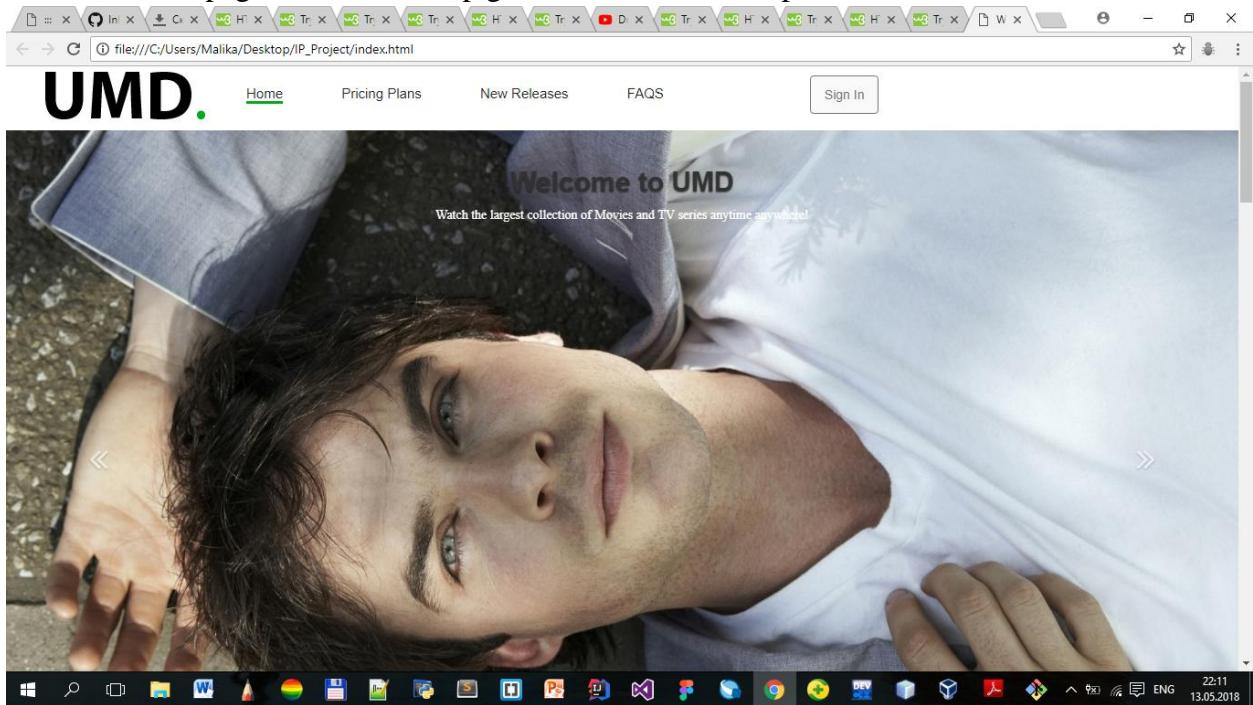

For sending mail, there was used send function in Mail Facade. It Use the mail template, which was created by using HTML and Laravel Blade and it placed in Views-mails/template.blade.php, \$data for passing data from form and function to filling mail automatically.

## Contributor to Back-End Part : Dilmurod Valiev

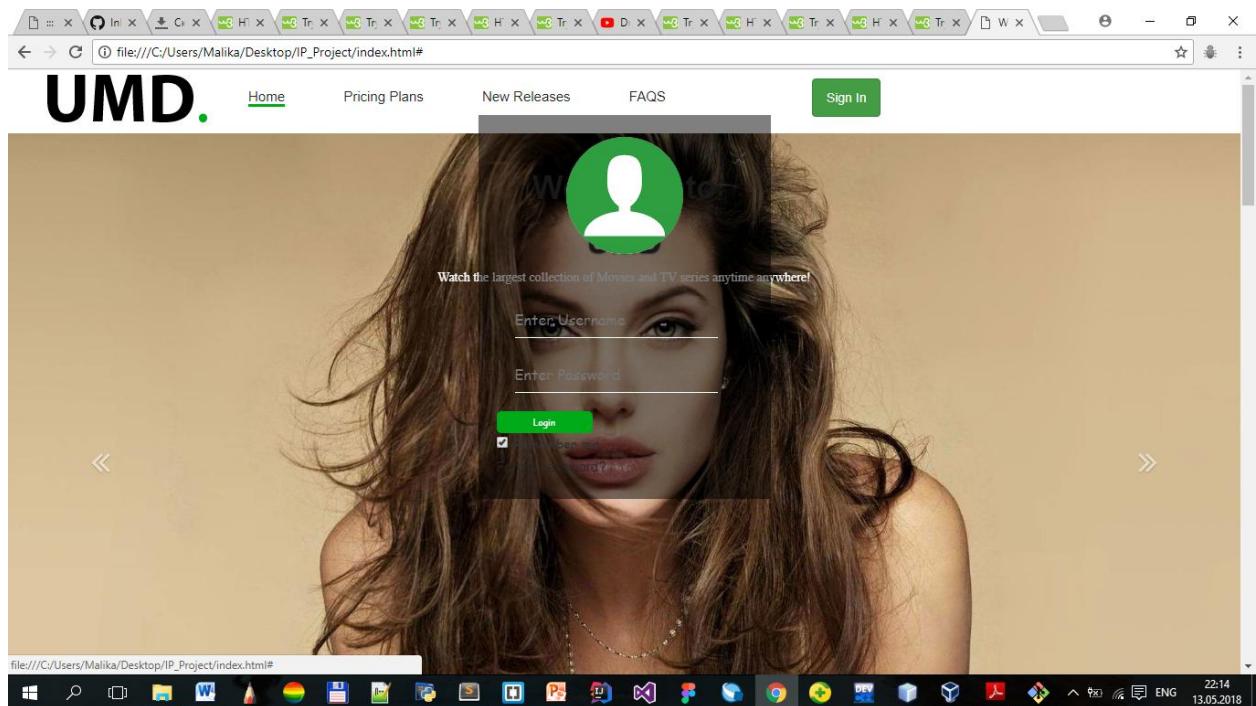

## Contributor : Malika Sadullaeva:

I have done Main Page, Account Page and tuition page.

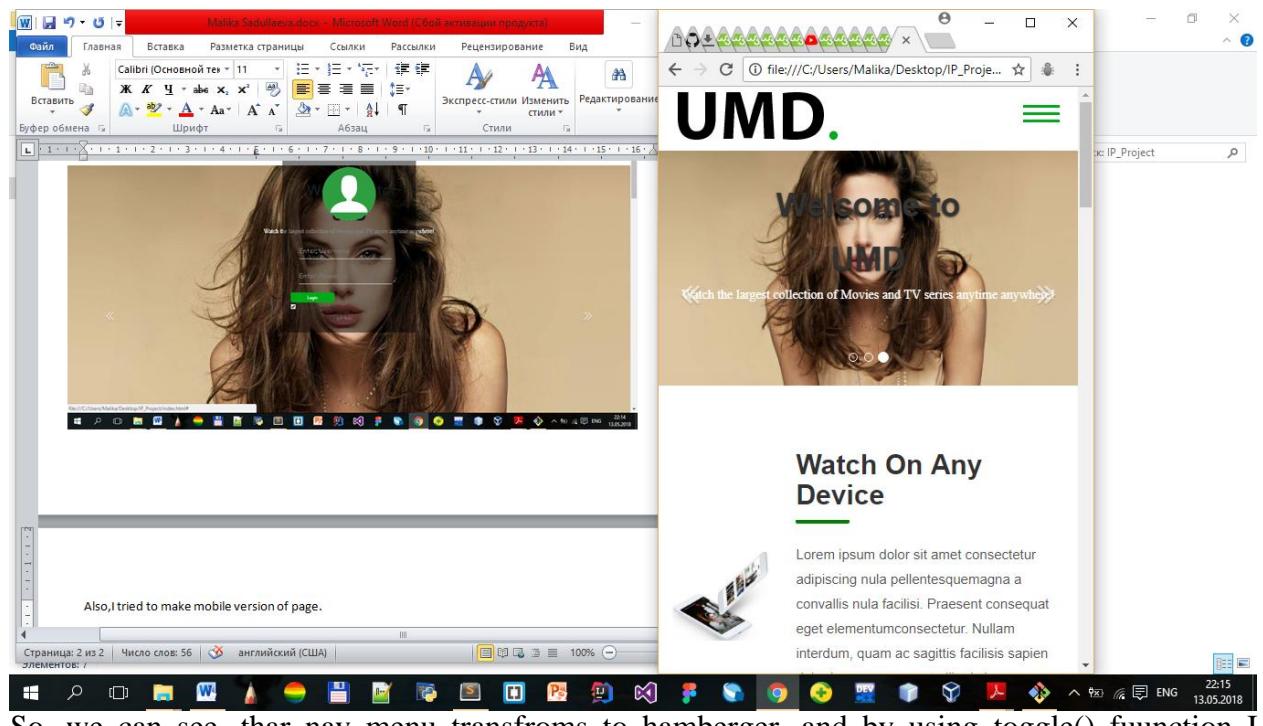

So, in main page I used bootstrap grid as well as bootstrap carousel.

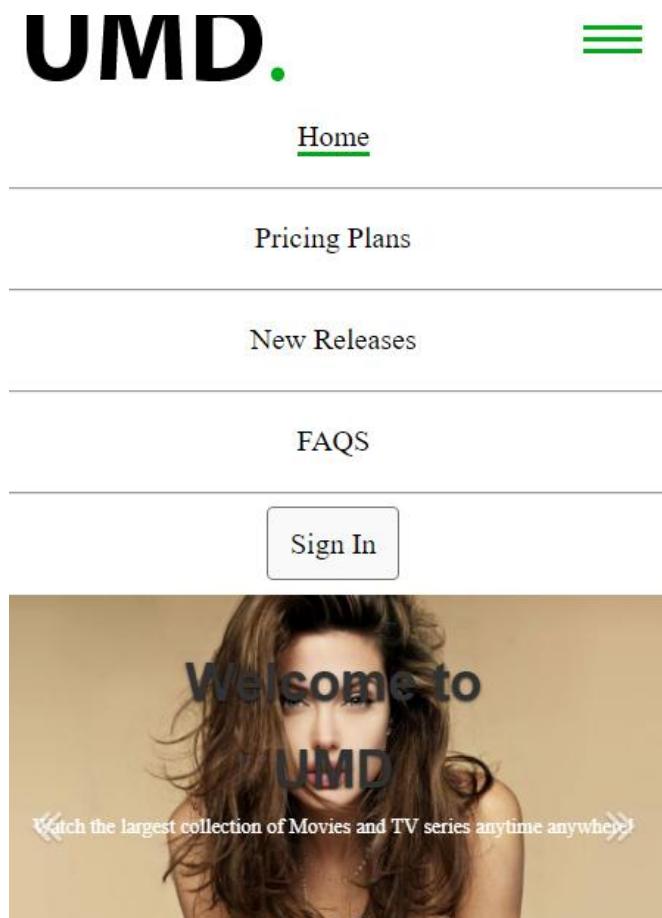

In order to make SignIn I used JS. Initially I gives to block: display:none, but when user clicks over Sign In content displayed.

Also, I tried to make mobile version of page.

So, we can see, that nav menu transforms to hamberger, and by using toggle() function I display content of nav-bar
